CONTENTS

Volume 21 Number 1

A. G. Davey, A. P. Henderson and R. J. Simpson	1	Nodulation and growth of subterranean clover (*Trifolium subterraneum* L.) in a drying acid soil
A. G. Davey and R. J. Simpson	9	Nitrogen fixation by subterranean clover (*Trifolium subterraneum* L.) in an acid soil in response to moisture deficits
N. Magan, P. Hand, I. A. Kirkwood and J. M. Lynch	15	Establishment of microbial inocula on decomposing wheat straw in soil of different water contents
M. Valmaseda, A. T. Martinez and G. Almendros	23	Contribution by pigmented fungi to P-type humic acid formation in two forest soils
G. Guiraud, C. Marol and M. C. Thibaud	29	Mineralization of nitrogen in the presence of a nitrification inhibitor
Bent T. Christensen and Steen Bech-Andersen	35	Influence of straw disposal on distribution of amino acids in soil particle size fractions
J. P. Schimel and M. K. Firestone	41	Inorganic N incorporation by coniferous forest floor material
Osama Anas, Inteaz Alli and R. D. Reeleder	47	Inhibition of germination of sclerotia of *Sclerotinia sclerotiorum* by salivary gland secretions of *Bradysia coprophila*
X. Vekemans, B. Godden and M. J. Penninckx	53	Factor analysis of the relationships between several physico-chemical and microbiological characteristics of some Belgian agricultural soils
J. M. Harris, J. A. Lucas, M. R. Davey, G. Lethbridge and K. A. Powell	59	Establishment of *Azospirillum* inoculant in the rhizosphere of winter wheat
S. F. Ledgard	65	Nutrition, moisture and rhizobial strain influence isotopic fractionation during N_2 fixation in pasture legumes
E. Sieverding, S. Toro and O. Mosquera	69	Biomass production and nutrient concentrations in spores of VA mycorrhizal fungi
K. P. Singh and Chandra Shekhar	73	Weight loss in relation to environmental factors during the decomposition of maize and wheat roots in a seasonally-dry tropical region
K. P. Singh and Chandra Shekhar	81	Concentration and release patterns of nutrients (N, P and K) during decomposition of maize and wheat roots in a seasonally-dry tropical region
A. E. Richardson and R. J. Simpson	87	Acid-tolerance and symbiotic effectiveness of *Rhizobium trifolii* associated with a *Trifolium subterraneum* L.-based pasture growing in an acid soil
Robert W. Parmelee, Michael H. Beare and John M. Blair	97	Decomposition and nitrogen dynamics of surface weed residues in no-tillage agroecosystems under drought conditions: influence of resource quality on the decomposer community
John B. Dickey and Eileen J. Kladivko	105	Sample unit sizes and shapes for quantitative sampling of earthworm populations in crop lands
Henrik Christensen, Dan Funck-Jensen and Annelise Kjøller	113	Growth rate of rhizosphere bacteria measured directly by the tritiated thymidine incorporation technique
Mark B. David, Myron J. Mitchell, Deidre Aldcorn and Robert B. Harrison	119	Analysis of sulfur in soil, plant and sediment materials: sample handling and use of an automated analyzer

H. Velvis, P. H. J. F. van den Boogert and G. Jager — 125 Role of antagonism in the decline of *Rhizoctonia solani* inoculum in soil

J. Fuhrmann and A. G. Wollum II — 131 *In vitro* growth responses of *Bradyrhizobium japonicum* to soybean rhizosphere bacteria

G. X. Cai, J. R. Freney, W. A. Muirhead, J. R. Simpson, D. L. Chen and A. C. F. Trevitt — 137 The evaluation of urease inhibitors to improve the efficiency of urea as an N-source for flooded rice

Elazar Fallik, Yaacov Okon, Ephraim Epstein, Alexander Goldman* and Meir Fischer — 147 Identification and quantification of IAA and IBA in *Azospirillum brasilense*-inoculated maize roots

Robert C. Abaidoo and Christopher van Kessel — 155 ^{15}N-uptake, N_2-fixation and rhizobial interstrain competition in soybean and bean, intercropped with maize

F. El-Atrach, H. Vierheilig and J. A. Ocampo — 161 Influence of non-host plants on vesicular–arbuscular mycorrhizal infection of host plants and on spore germination

J. M. Garcia-Garrido and J. A. Ocampo — 165 Effect of VA mycorrhizal infection of tomato on damage caused by *Pseudomonas syringae*

Short Communications

C. J. Smith, D. M. Whitfield and O. A. Gyles — 169 Estimation of available N status of soil by wheat and barley: A-values

D. Backhouse and A. Stewart — 173 Interactions between *Bacillus* species and sclerotia of *Sclerotium cepivorum*

Nelida Giambiagi and A. Lodeiro — 177 Response of the bacterial microflora of a sodic saline soil to different concentrations of nitrogen and sodium in agar culture

B. S. Griffiths — 179 Improved extraction of iodonitrotetraxolium-formazan from soil with dimethylformamide

Forthcoming Papers — 181

Volume 21 Number 2

B. L. Williams and B. S. Griffiths — 183 Enhanced nutrient mineralization and leaching from decomposing Sitka spruce litter by enchytraeid worms

H. H. Janzen and Y. Bruinsma — 189 Methodology for the quantification of root and rhizosphere nitrogen dynamics by exposure of shoots to ^{15}N-labelled ammonia

K. Mulongoy and A. Bedoret — 197 Properties of worm casts and surface soils under various plant covers in the humid tropics

Robert L. Sinsabaugh and A. E. Linkins — 205 Cellulase mobility in decomposing leaf litter

H. Insam, D. Parkinson and K. H. Domsch — 211 Influence of macroclimate on soil microbial biomass

Jawed M. Sarkar, Andrzej Leonowicz and Jean-Marc Bollag — 223 Immobilization of enzymes on clays and soils

N. Sanginga, K. Mulongoy and A. Ayanaba — 231 Effectivity of indigenous rhizobia for nodulation and early nitrogen fixation with *Leucaena leucocephala* grown in Nigerian soils

Frank Ziegler — 237 Changes of lipid content and lipid composition in forest humus layers derived from Norway spruce

Graham P. Sparling and Andrew W. West — 245 Importance of soil water content when estimating soil microbial C, N and P by the fumigation–extraction methods

P. H. J. F. van den Boogert — 255 Colonization of roots and stolons of potato by the mycoparasitic fungus *Verticillium biguttatum*

M. H. Opperman, M. Wood and P. J. Harris — 263 Changes in microbial populations following the application of cattle slurry to soil at two temperatures

Walter J. Kaiser, Richard M. Hannan and David M. Weller — 269 Biological control of seed rot and preemergence damping-off of chickpea with fluorescent pseudomonads

Edward F. Neuhauser, Roy A. Norton, Raymond C. Loehr and Deborah Y. Sillman — 275 Earthworm and soil microarthropod responses to oily waste application

W. B. Silvester — 283 Molybdenum limitation of asymbiotic nitrogen fixation in forests of Pacific Northwest America

Dorothy M. Halsall and Alan H. Gibson — 291 Nitrogenase activity of a range of diazotrophic bacteria on straw, straw breakdown products and related compounds

C. Chenu — 299 Influence of a fungal polysaccharide, scleroglucan, on clay microstructures

Henri Milhomme, Danielle Vega, Jean-Louis Marty et Jean Bastide — 307 Dégradation de l'herbicide chlorprophame dans un sol: role de l'introduction de *Pseudomonas alcaligenes* et de *Pseudomonas cepacia*

Helvi Heinonen-Tanski — 313 The effect of temperature and liming on the degradation of glyphosate in two arctic forest soils

Short Communications

M. H. Opperman, M. Wood and P. J. Harris — 319 Changes in inorganic N following the application of cattle slurry to soil at two temperatures

A. Simon — 323 Biological control of take-all of wheat by *Trichoderma koningii* under controlled environmental conditions

G. B. Reddy and Alexandra Faza — 327 Dehydrogenase activity in sludge amended soil

Corrigenda — 329

Forthcoming Papers — 330

Announcement — i

Volume 21 Number 3

Review

A. Simon and K. Sivasithamparam — 331 Pathogen-suppression: a case study in biological suppression of *Gaeumannomyces graminis* var. *tritici* in soil

General Papers

R. D. Guffy, R. M. Vanden Heuvel, B. L. Vasilas, R. L. Nelson, M. A. Frobish and J. D. Hesketh — 339 Evaluation of the N_2-fixation capacity of four soybean genotypes by several methods

G. Samson and S. A. Visser — 343 Surface-active effects of humic acids on potato cell membrane properties

W. de Boer, H. Duyts and H. J. Laanbroek — 349 Urea stimulated autotrophic nitrification in suspensions of fertilized, acid heath soil

R. E. Wheatley and B. L. Williams — 355 Seasonal changes in rates of potential denitrification in poorly-drained reseeded blanket peat

Emil Stutz, Günther Kahr and Geneviève Défago — 361 Clays involved in suppression of tobacco black root rot by a strain of *Pseudomonas fluorescens*

A. L. Cogle, P. G. Saffigna and W. M. Strong — 367 Carbon transformations during wheat straw decomposition

M. S. Reddy and **J. E. Rahe** 373 Growth effects associated with seed bacterization not correlated with populations of *Bacillus subtilus* inoculant in onion seedling rhizospheres

M. S. Reddy and **J. E. Rahe** 379 *Bacillus subtilis* B-2 and selected onion rhizobacteria in onion seedling rhizospheres: effects on seedling growth and indigenous rhizosphere microflora

Weixin Cheng and **David C. Coleman** 385 A simple method for measuring CO_2 in a continuous air-flow system: modifications to the substrate-induced respiration technique

D. A. Schisler and **R. G. Linderman** 389 Selective influence of volatiles purged from coniferous forest and nursery soils on microbes of a nursery soil

D. A. Schisler and **R. G. Linderman** 397 Response of nursery soil microbial populations to volatiles purged from soil around Douglas-fir ectomycorrhizae

D. A. Schisler and **R. G. Linderman** 403 Influence of humic-rich organic amendments to coniferous nursery soils on Douglas-fir growth, damping-off and associated soil microorganisms

Louise E. Jackson, Joshua P. Schimel and **Mary K. Firestone** 409 Short-term partitioning of ammonium and nitrate between plants and microbes in an annual grassland

M. D. Jawson, L. F. Elliott, R. I. Papendick and **G. S. Campbell** 417 The decomposition of ^{14}C-labeled wheat straw and ^{15}N-labeled microbial material

M. A. Adams, P. J. Polglase, P. M. Attiwill and **C. J. Weston** 423 *In situ* studies of nitrogen mineralization and uptake in forest soils; some comments on methodology

Stefano Dumontet and **S. P. Mathur** 431 Evaluation of respiration-based methods for measuring microbial biomass in metal-contaminated acidic mineral and organic soils

J. Postma, J. A. van Veen and **S. Walter** 437 Influence of different initial soil moisture contents on the distribution and population dynamics of introduced *Rhizobium leguminosarum* biovar *trifolii*

J. W. Dalenberg and **G. Jager** 443 Priming effect of some organic additions to ^{14}C-labelled soil

Short Communications

Shinsuke Fujihara and **Yasuo Harada** 449 A novel polyamine, aminobutylhomospermidine, in Japanese volcanic ash soils

J. C. Dodd and **P. Jeffries** 453 Effect of over-winter environmental conditions on vesicular–arbuscular mycorrhizal infection of autumn-sown cereals

J. N. Ladd and **M. Amato** 457 Relationship between microbial biomass carbon in soils and absorbance (260 nm) of extracts of fumigated soils

S. E. Viteri and **E. L. Schmidt** 461 Chemoautotrophy as a strategy in the ecology of indigenous soil bradyrhizobia

X. T. He and **F. J. Stevenson** 465 Revised formulas for calculating extractability ratios of immobilized N in soils

Forthcoming Papers 469

Volume 21 Number 4

Traute-Heidi Anderson and **K. H. Domsch** 471 Ratios of microbial biomass carbon to total organic carbon in arable soils

G. Almendros, F. J. González-Vila and **F. Martin** 481 Room temperature alkaline permanganate oxidation of representative humic acids

A. A. Meharg and **K. Killham** 487 Distribution of assimilated carbon within the plant and rhizosphere of *Lolium perenne*: influence of temperature

J. Cortez, R. Hameed and **M. B. Bouché** 491 C and N transfer in soil with or without earthworms fed with ^{14}C- and ^{15}N-labelled wheat straw

E. Garnier-Sillam, J. Renoux et F. Toutain	499	Les composés humiques des termitières de *Thoracotermes macrothorax* (humivore) et de *Macrotermes mülleri* (champignonniste)
John M. Blair, D. A. Crossley Jr and Steve Rider	507	Effects of naphthalene on microbial activity and nitrogen pools in soil-litter microcosms
C. P. Chanway, R. K. Hynes and L. M. Nelson	511	Plant growth-promoting rhizobacteria: effects on growth and nitrogen fixation of lentil (*Lens esculenta* Moench) and pea (*Pisum sativum* L.)
S. Rosendahl, R. Sen, Christine M. Hepper and C. Azcon-Aguilar	519	Quantification of three vesicular–arbuscular mycorrhizal fungi (*Glomus* spp) in roots of leek (*Allium porrum*) on the basis of activity of diagnostic enzymes after polyacrylamide gel electrophoresis
M. A. Adams and L. T. Byrne	523	^{31}P-NMR analysis of phosphorus compounds in extracts of surface soils from selected Karri (*Eucalyptus diversicolor* F. Muell.) forests
S. M. Shen, P. B. S. Hart, D. S. Powlson and D. S. Jenkinson	529	The nitrogen cycle in the Broadbalk Wheat Experiment: ^{15}N-labelled fertilizer residues in the soil and in the soil microbial biomass
D. S. Jenkinson and L. C. Parry	535	The nitrogen cycle in the Broadbalk Wheat Experiment: a model for the turnover of nitrogen through the soil microbial biomass
P. A. Maplestone and R. Campbell	543	Colonization of roots of wheat seedlings by bacilli proposed as biocontrol agents against take-all
B. A. Summerell and L. W. Burgess	551	Decomposition and chemical composition of cereal straw
P. M. Hicks and T. E. Loynachan	561	Bacteria of the soybean rhizosphere and their effect on growth of *Bradyrhizobium japonicum*
M. Hyakumachi, H. J. M. Löffler and J. L. Lockwood	567	Methods for determination of carbon loss from fungal propagules incubated in soil
R. Pérez-Galdona, J. Corzo, M. León-Barrios and A. M. Gutiérrez-Navarro	573	Aromatic amino acid aminotransferases in *Rhizobium leguminosarum* biovar *trifolii*. Their role in indoleacetic acid synthesis
J. M. Barea, F. El-Atrach and R. Azcón	581	Mycorrhiza and phosphate interactions as affecting plant development, N_2-fixation, N-transfer and N-uptake from soil in legume–grass mixtures by using a ^{15}N dilution technique
M. Elliott Juhnke, D. E. Mathre and D. C. Sands	591	Relationship between bacterial seed inoculum density and rhizosphere colonization of spring wheat
Charles W. Rice and James M. Tiedje	597	Regulation of nitrate assimilation by ammonium in soils and in isolated soil microorganisms
Short Communications		
Erick Zagal	603	Effects of microwave radiation on carbon and nitrogen mineralization in soil
E. S. P. Bromfield, L. R. Barran and Danielle Prévost	607	Is frequency of occurrence of indigenous *Rhizobium meliloti* in nodules of field grown plants related to intrinsic competitiveness?
Forthcoming Papers	611	

Volume 21 Number 5

Peter M. Groffman and James M. Tiedje	613	Denitrification in north temperate forest soils: spatial and temporal patterns at the landscape and seasonal scales
Peter M. Groffman and James M. Tiedje	621	Denitrification in north temperate forest soils: relationships between denitrification and environmental factors at the landscape scale
V. L. Smith, S. F. Jenkins†, Z. K. Punja and D. M. Benson	627	Survival of sclerotia of *Sclerotium rolfsii*: influence of sclerotial treatment and depth of burial
Muhammad Arshad and W. T. Frankenberger Jr	633	Biosynthesis of ethylene by *Acremonium falciforme*

SBB 21/8—H

R. Azcón 639 Selective interaction between free-living rhizosphere bacteria and vesicular–arbuscular mycorrhizal fungi

Matthew J. Morra and **Larry L. Freeborn** 645 Catalysis of amino acid deamination in soils by pyridoxal-5′-phosphate

L. Lopez-Reyes, L. Soto-Urzua, M. A. Mascarua-Esparza, I. Herrera-Camacho and **J. Caballero-Mellado** 651 Antibiotic resistance and β-lactamase activity in *Azospirillum*

Tsutomu Ohno 657 Rhizosphere pH and aluminum chemistry of red oak and honey-locust seedlings

T. Nishio and **T. Fujimoto** 661 Mineralization of soil organic nitrogen in upland fields as determined by a $^{15}NH_4^+$ dilution technique, and absorption of nitrogen by maize

S. F. Ledgard, G. J. Brier and **S. U. Sarathchandra** 667 Plant uptake and microbial immobilization of ^{15}N-labelled ammonium applied to grass–clover pasture—influence of simulated winter temperature and time of application

C. M. Monreal and **W. B. McGill** 671 Kinetic analysis of cystine cycling through the solution of a Gray Luvisol and an Andept soil

C. M. Monreal and **W. B. McGill** 681 Kinetic analysis of soil microbial components under perturbed and steady-state conditions in a Gray Luvisol

C. M. Monreal and **W. B. McGill** 689 The dynamics of free cystine cycling at steady-state through the solutions of selected cultivated and uncultivated Chernozemic and Luvisolic soils

C. M. Monreal and **W. B. McGill** 695 The effects of soil amendments on the dynamics of free cystine cycling at steady-state through the solutions of a Black Chernozemic and an Andept soil

K. M. Scow, S. K. Schmidt and **M. Alexander** 703 Kinetics of biodegradation of mixtures of substrates in soil

S. S. Dudeja and **A. L. Khurana** 709 Persistence of *Bradyrhizobium* sp. (*Cajanus*) in a sandy loam

F. Azam, F. J. Stevenson and **R. L. Mulvaney** 715 Chemical extraction of newly immobilized ^{15}N and native soil N as influenced by substrate addition rate and soil treatments

Yoshihisa Homma, Zenji Sato, Fukushi Hirayama, Katsuhiro Konno, Haruhisa Shirahama and **Takahito Suzui** 723 Production of antibiotics by *Pseudomonas cepacia* as an agent for biological control of soilborne plant pathogens

A. D. Heritage, A. D. Rovira, G. D. Bowen and **R. L. Correll** 729 Influence of soil water on the growth of *Gaeumannomyces graminis* var. *tritici* in soil: use of a mathematical model

K. Inubushi, P. C. Brookes and **D. S. Jenkinson** 733 Adenosine 5′-triphosphate and adenylate energy charge in water-logged soil

Short Communication
K. Inubushi, P. C. Brookes and **D. S. Jenkinson** 741 Influence of paraquat on the extraction of adenosine triphosphate from soil by trichloracetic acid

Forthcoming Papers 743

Volume 21 Number 6

R. J. Thompson and **R. G. Burns** 745 Control of *Pythium ultimum* with antagonistic fungal metabolites incorporated into sugar beet seed pellets

I. L. Pepper, K. L. Josephson, C. S. Nautiyal and **D. P. Bourque** 749 Strain identification of highly-competitive bean rhizobia isolated from root nodules: use of fluorescent antibodies, plasmid profiles and gene probes

J. J. Coll, H. H. Schomberg and R. W. Weaver — 755 Effectiveness of rhizobial strains on arrowleaf clover grown in acidic soil containing manganese

P. G. Saffigna, D. S. Powlson, P. C. Brookes and G. A. Thomas — 759 Influence of sorghum residues and tillage on soil organic matter and soil microbial biomass in an Australian vertisol

D. J. Ross — 767 Estimation of soil microbial C by a fumigation–extraction procedure: influence of soil moisture content

Eric A. Davidson, Robert W. Eckert, Stephen C. Hart and Mary K. Firestone — 773 Direct extraction of microbial biomass nitrogen from forest and grassland soils of California

Robin M. Kummer and L. David Kuykendall — 779 Symbiotic properties of amino acid auxotrophs of *Bradyrhizobium japonicum*

G. Hardarson, M. Golbs and S. K. A. Danso — 783 Nitrogen fixation in soybean (*Glycine max* L. Merrill) as affected by nodulation patterns

Lars Reier Bakken and Rolf Arnt Olsen — 789 DNA-content of soil bacteria of different cell size

Ralph E. J. Boerner and Shari D. Koslowsky — 795 Microsite variations in soil chemistry and nitrogen mineralization in a beech–maple forest

D. C. Whitehead, D. R. Lockyer and N. Raistrick — 803 Volatilization of ammonia from urea applied to soil: influence of hippuric acid and other constituents of livestock urine

T. Isakeit and J. L. Lockwood — 809 Lethal effect of atrazine and other triazine herbicides on ungerminated conidia of *Cochliobolus sativus* in soil

D. E. Bignell — 819 Relative assimilations of ^{14}C-labelled microbial tissues and ^{14}C-plant fibre ingested with leaf litter by the millipede *Glomeris marginata* under experimental conditions

A. Gur and Y. Cohen — 829 The peach replant problem—some causal agents

R. L. Sinsabaugh and A. E. Linkins — 835 Natural disturbance and the activity of *Trichoderma viride* cellulase complexes

K. E. Giller, S. P. McGrath and P. R. Hirsch — 841 Absence of nitrogen fixation in clover grown on soil subject to long-term contamination with heavy metals is due to survival of only ineffective *Rhizobium*

F. Azam, R. L. Mulvaney and F. J. Stevenson — 849 Chemical distribution and transformations of non-symbiotically fixed ^{15}N in three soils

O. Yarden, A. Gamliel, N. Aharonson and J. Katan — 857 Solarization enhances dissipation of carbendazim (MBC) in soil

Short Communications

O. Yarden, M. Freund, J. Katan, N. Aharonson and B. Rubin — 863 Cross-suppression of accelerated degradation of carbendazim (MBC) by soil exhibiting reduced fluridone efficacy

P. Widmer, P. C. Brookes and Lynn C. Parry — 865 Microbial biomass nitrogen measurements in soils containing large amounts of inorganic nitrogen

Alex Sivan and Ilan Chet — 869 Cell wall composition of *Fusarium oxysporum*

Forthcoming Papers — 873

Volume 21 Number 7

R. B. Thompson — 875 Denitrification in slurry-treated soil: occurrence at low temperatures, relationship with soil nitrate and reduction by nitrification inhibitors

E. A. E. Elsheikh and M. Wood — 883 Response of chickpea and soybean rhizobia to salt: influence of carbon source, temperature and pH

E. A. E. Elsheikh and M. Wood — 889 Response of chickpea and soybean rhizobia to salt: osmotic and specific ion effects of salts

Bijay-Singh, J. C. Ryden✠ and D. C. Whitehead	897	Denitrification potential and actual rates of denitrification in soils under long-term grassland and arable cropping
D. L. Burton and W. B. McGill	903	Role of enzyme stability in controlling histidine deaminating activity in soil
P. Fusi, G. G. Ristori, L. Calamai and G. Stotzky	911	Adsorption and binding of protein on "clean" (homoionic) and "dirty" (coated with Fe oxyhydroxides) montmorillonite, illite and kaolinite
V. V. S. R. Gupta and J. J. Germida	921	Influence of bacterial–amoebal interactions on sulfur transformations in soil
M. N. Reddy, G. V. D. Anandaraj and P. Suvarnalatha Devi	931	Chemical composition of sclerotial exudates of *Macrophomina phaseolina* pathogenic to groundnut
C. C. Moyo, D. E. Kissel and M. L. Cabrera	935	Temperature effects on soil urease activity
P. J. Smethurst and E. K. S. Nambiar	939	An appraisal of the *in situ* soil-core technique for measuring nitrogen uptake by a young *Pinus radiata* plantation
M. H. Fu and M. A. Tabatabai	943	Nitrate reductase activity in soils: effects of trace elements
C. Feller, J. Trichet, J. C. Fontes et C. Marius	947	Sur le rôle de la végétation dans le stockage du soufre dans les sols de mangrove (Sénégal). Résultats préliminaires
Raymond S. Pacovsky	953	Metabolic differences in *Zea–Glomus–Azospirillum* symbioses
J.-P. Boudot, B. A. Bel Hadj, R. Steiman and F. Seigle-Murandi	961	Biodegradation of synthetic organo–metallic complexes of iron and aluminium with selected metal to carbon ratios
K. F. Nieto and W. T. Frankenberger Jr	967	Biosynthesis of cytokinins by *Azotobacter chroococcum*
Short Communications		
J. K. Martin	973	*In situ* decomposition of root-derived carbon
P. Lähdesmäki and R. Piispanen	975	Changes in concentrations of free amino acids during humification of spruce and aspen leaf litter
Forthcoming Papers	979	

Volume 21 Number 8

S. P. Harrison, J. P. W. Young and D. G. Jones	981	*Rhizobium* population genetics: host preference and strain competition effects on the range of *Rhizobium leguminosarum* biovar *trifolii* genotypes isolated from natural populations
S. U. Sarathchandra, K. W. Perrott and R. A. Littler	987	Soil microbial biomass: influence of simulated temperature changes on size, activity and nutrient-content
B. Nicolardot, G. Guiraud, C. Perrot, Y. Couton et G. Catroux	995	Prise en compte de la réorganisation d'azote lors de l'estimation de l'azote de la biomasse microbienne avec la méthode de fumigation au chloroforme
D. C. Hayes and T. R. Seastedt	1003	Nitrogen dynamics of soil water in burned and unburned tallgrass prairie
J. F. Slattery and D. R. Coventry	1009	Populations of *Rhizobium lupini* in soils used for cereal–lupin rotations in north-east Victoria
Barry R. Dalton, Udo Blum and Sterling B. Weed	1011	Plant phenolic acids in soils: sorption of ferulic acid by soil and soil components sterilized by different techniques
P. G. Brisbane, J. R. Harris and Rita Moen	1019	Inhibition of fungi from wheat roots by *Pseudomonas fluorescens* 2–79 and fungicides

Michael H. Beare, John M. Blair and **Robert W. Parmelee** 1027 Resource quality and trophic responses to simulated throughfall: effects on decomposition and nutrient flux in a no-tillage agroecosystem

Dorothy M. Halsall and **Alan H. Gibson** 1037 Nitrogenase activity by diazotrophs grown on a range of agricultural plant residues

B. S. Griffiths 1045 Enhanced nitrification in the presence of bacteriophagous protozoa

S. K. A. Danso and **G. D. Bowen** 1053 Methods of inoculation and how they influence nodulation pattern and nitrogen fixation using two contrasting strains of *Bradyrhizobium japonicum*

Joshua P. Schimel, Louise E. Jackson and **Mary K. Firestone** 1059 Spatial and temporal effects on plant–microbial competition for inorganic nitrogen in a California annual grassland

Luc Abbadie and **Michel Lepage** 1067 The role of subterranean fungus comb chambers (Isoptera, Macrotermitinae) in soil nitrogen cycling in a preforest savanna (Côte d'Ivoire)

P. Lucas, A. Sarniguet, J. M. Collet et **Martine Lucas** 1073 Réceptivité des sols au piétin échaudage (*Gaeumannomyces graminis* var *tritici*): influence de certaines techniques culturales

Short Communications

J. Fuhrmann 1079 Serological distribution of *Bradyrhizobium japonicum* as influenced by soybean cultivar and sampling location

M. Diaz-Raviña, M. J. Acea and **T. Carballas** 1083 Effects of incubation and chloroform fumigation on the nutrient contents of some acid soils

Corrigenda 1085

Forthcoming Papers 1086
